## **INFORMATION REGARDING THE RECLAMITE APPLICATION PROJECT**

Pavement Technology, Inc. has reported that they completed the application of the asphalt pavement maltene rejuvenator (Reclamite).

While we understand some of the concerns raised. There is a lot of misinformation circulating within the community. The work has not been completed. Just as in any other project once the contractor has completed the application work will begin on clean up and punch list items.

The vendor's cleanup crew has started on Mulberry, and they will continue through the community. Their team is cleaning, spraying, and street sweeping. The paver walkways will be addressed as well as the concrete aprons. The District Engineer has been onsite for an inspection, and he will continue to monitor this process with the contractor.

The District previously provided complete details on the project. All residents were informed if driving on the product prior to the area being sanded not to drive inside of garages and to stay off brick pavers driveways.

While we understand many of the concerns raised the work needs to be completed. The contractor will provide a product that can be applied to driveways where the product has been tracked. If you have the product on your driveway, please contact the Operations Manager's Office at 941-746-6670.

As we receive further information and updates, we will post updates on the District's Website.
